Subject: RE: Uinta Basin Aerial IR Survey Project - Steering Committee
Attachments: IRSurveyReport2018_wcomments.docx

All: You may or may not find this useful in preparation for our call next week, but the attachment is the IR survey report with all the suggestions for changes I have received (comments like "this is great" or "I agree" make me happy, but they don't require action so I didn't include them here). I placed the comments where they belong in the text. I haven't made any changes to the text itself. I think all of the suggestions are useful and most are possible and would make the report better. A couple of them might be difficult to accommodate. We can go through the comments during the call. Thanks.

Seth

-----Original Appointment-----
